OUR ACCOMPLISHMENT

- ✓ Renovated a classroom
- ✓ Renovated a kitchen
- ✓ Built 2 restrooms
- ✓ Planted new trees for shelter
- ✓ Supplied school with both classroom and kitchen table and chairs, bookshelves, books, learning materials and kitchen wares and cooking items.

ABOUT THE PROJECT

Our project in Nepal brought us to the village of Thaprek, in the Tanahun District of Nepal, east of the city of Pokhara. The village is situated high in the Himalayas. Here is a community that lives far from the amenities of urban life. The local school, Shree Saraswati School has been growing in number the last years and, with no upgrades to their facilities in over 30 years, they were in need of improvements to their grounds.

GiveBack GiveAway worked with the longtime operating NGO, Pahar Trust, to provide improved facilities for the students. These improvements included upgrades to their kitchen and dining room. The cooking facilities at the school were poor. We provided new cooking appliances, cooking ware, utensils, and we also added tables and chairs. We did this with the intention of enabling the school to provide healthy and nutritious meals to the students. Next item was to completely refurbish an Early Childhood Development (ECD) room. We tripped the place and added all new carpet, paint, new furniture and learning equipment, providing the youngest children in the village with a safe space to develop and learn. These children now have a dedicated facility to support their early childhood development. Lastly, but not least important, we added 2 toilet blocks. We supplied local workers to construct new toilet buildings, equipped with sinks and showers to provide new, clean and safe restrooms that will help to keep students healthy and well with improved sanitation facilities.
